

Story (Based on the analysis of COCA):

Abraham Lincoln was one of the US presidents who was almost equally spoken and discussed about in Web, Blog, Magazine, NEWS. He was known for his incredibly intelligent and focused mind. During his tenure he had many internal oppositions in his party. His popularity grew between 2005-2014 because politicians started using his terms of social freedom, end of slavery etc. to increase their chances of election. He was assassinated in 1865 due to his strong opinions and federal way of governance.

Frequency:

Frequency-chart subsection-Web :

Context:

The screenshot shows the English-Corpora COCA website interface. The 'CONTEXT' tab is selected, displaying a list of 22 search results for the term 'Abraham Lincoln'. Each result includes a year, a corpus source (e.g., ACAD, GeorgiaHisQ), and a snippet of text containing the search term. The interface includes a search bar, navigation tabs (SEARCH, CHART, CONTEXT, OVERVIEW), and a list of search results.

Year	Source	Text Snippet
2018	ACAD	...study of Religions and Ideologies
2014	ACAD	GeorgiaHisQ
2014	ACAD	GeorgiaHisQ
2014	ACAD	GeorgiaHisQ

2003	ACAD	SocialStudies

Collocate:

The screenshot shows the English-Corpora COCA website interface. The 'COLLOCATES' tab is selected, displaying a form to input a word or phrase and a list of collocates. The input field contains 'Abraham Lincoln'. The collocates are listed in a table with columns for frequency and direction. The interface includes a search bar, navigation tabs (SEARCH, FREQUENCY, CONTEXT, OVERVIEW), and a list of search results.

Word/phrase [POS]	Collocates [POS]
Abraham Lincoln	*
	+ 4 3 2 1 0 0 1 2 3 4 +

Find collocates Reset

COLLOCATES display

To find collocates in COCA, you would normally input a word via **Word**, and then select Collocates on the next page. In COCA, the collocates display (via **Word**) is much better than with the other corpora from English-Corpora.org, such as automatically grouping collocates by part of speech. Some examples: bread, kiss (v), rough, or naturally.

The only time that you'd want to use the form to the left is when you want to find collocates for a string of words (e.g. put away or fire station), or when you absolutely need to limit the number of words left or right.

Note however that using the form to the left for individual words (especially high frequency words) will be much slower, and in many cases the search will "time out", resulting in an error. In nearly all cases, it is much better to search for collocates via **Word**.

See what words occur near other words, which provides great insight into meaning and usage. For example, nouns after thick or look into, verbs before money, or any word near crack, believe, loud, or quickly.

More information: compare to LIST display, types of collocates, direction and distance of collocates, variable length queries.
